EXPERIENCE

Project Manager

📅 Sep 2024 - Present

Different Hunger | United States | Remote

- Customization of **Notion databases** for internal processes and client communication.
- Documentation and **SOPs** creation
- Google Workspace, Google Analytics, Microsoft Clarity
- **Stakeholder engagement**
- **HR**: Interviews, budget management, and consultant management.
- Strategic Project **Planning and Execution**
- **Cross-functional Team** Alignment, Coordination, and Leadership.

Front End Developer

📅 Nov 2022 - Nov 2023

Tem Renewables & Environment | London, United Kingdom | Remote

I collaborated closely with a talented team to develop a successful MVP, utilizing web technologies like **React**, **TypeScript**, and **Next.js** to create dynamic, user-friendly interfaces.

- **Use Kanban** methodologies to meet project deadlines.
- Building scalable and maintainable codebases using **Styled Components** and **RTK Query**
- Streamlining UI development and maintaining consistency across components with tools like **Storybook**.
- Assisted the marketing team with **Story Block** to streamline content updates and enhance collaboration between developers and marketers.
- Contributed to **architectural discussions**, ensuring scalable solutions and alignment with business objectives.

Full Stack Developer

📅 Jan 2022 - Jul 2022

Emmy | Berlin Germany | On Site

I gathered requirements across departments to shape product features. Additionally, I created wireframes and designs in Figma to visualize solutions before implementation.

- React (TypeScript)
- Jira
- Monday
- Postman
- Figma
- E2E testing
- Pipelines
- Material UI
- Zustand
- UX/UI
- SCSS modules
- Confluence
- Rest API

Front End Developer

Accenture | Milan, Italy | Hibrid

Feb 2021 - Dec 2021

This role marked my initial experience in a significant Agile environment, enabling me to engage fully in every phase of the development lifecycle.

- **Micro-frontend Architecture:** Led the creation and oversight of a pivotal portal and component library, enhancing modularity and uniformity across different team outputs.
- **Documentation:** Authored detailed documentation in Confluence to standardize practices and ensure consistency across diverse teams.
- **Agile Methodology:** Engaged in a large Agile team setting, experiencing the full Agile development cycle from planning to deployment.
- **Customized React Templates:** Developed tailored templates for libraries and applications, optimizing development efficiency and product consistency.
- **Test-Driven Development (TDD):** Implemented TDD practices to ensure high-quality, dependable code from the start.

Project Manager

Human Beyond Labs | Netherlands

Apr 2017 - Dec 2019

A creative studio specializing in immersive storytelling through AI-powered installations.

- Trello, Notion, Slack
- Scrum Master
- Unity 3D
- Interactive installations/web Apps as a product demo
- AI-based software development for computer vision
